Groningen Students Trained on DigiFolk's methodology

09 May 2023

At the University College Groningen (University of Groningen) DigiFolk features in the undergraduate student project entitled Tales of Wisdom. This student project was designed by DigiFolk members: Maria Ioannou and Theisje van Dorsten to align with DigiFolk. Students of the project Tales of Wisdom are meant to complete all the steps of the DigiFolk project, namely story collection from marginalised communities and story curation, digitization, and dissemination. For this reason, these students were trained on DigiFolk methodology by the Methodology team who arrived in Groningen a day in advance of the partners' meeting precisely for this purpose. Students also received technical training on audio and video making from CARDET. This training on DigiFolk's methodology served as a dry run for the upcoming partner training
